

►  **Stanztec 2016, Pforzheim**  
21.06. - 23.06.2016

5. Stanztec presents itself as a technology event of "A" class!

With an unexpected success for the exhibitors and of know-how based detail and system solutions for the professional visitors – the Stanztec trade fair for stamping technology had an impressive scene in the 5th edition! From 21 to 23 June 2016 the gold and jewelry city of Pforzheim was dominated by the high-end punching technique again. The Congress Center Pforzheim provided space for exactly 169 manufacturers and suppliers. The suppliers presented the 3512 trade visitors from 25 countries on 3,500 m<sup>2</sup> of exhibition space, a big variety of innovative products and services from the stamping technology world.

The national and international audience offered a wide range of technologies, processes, products, tools and production facilities, of stamping technologies. The progressive networking of processes can thereby flow visible. Premium punched parts are integrated in full automated workflows and

mechatronics assemblies exist. Starting from the functional integration of punched parts and especially the existing assemblies, Designers and the tooling employees overcome new challenges. But they will handle it.

The Rau Company was presented by a representative booth. With a positive result of visitors and multiple interviews like technical discussions and resulting concrete inquiries, the Stanztec ends as an excellent exhibition.

The next fair where you can find us is the Electronica in Munich. This takes place during the period from 08th to the 11th November 2016. We would be delighted to welcome you as a visitor to our stand.
